- Notes:**
- 1) Farm Nutrients will send a completed order form for each field with applicable prices.
 - 2) To complete the order, these forms must be signed and sent back to Farm Nutrients, along with a FSA map, to receive any sign up discounts.
 - 3) Farm Nutrients will use the desired tons/acre unless it exceeds the max allowed.

Given the limited supply of product, the following guidelines have been put in place:

- 1) Farm Nutrients will insure prepay customers receive product.
- 2) Invoicing will be by the ton. Product will be hauled by truckloads to fields coming as close as possible to requested tons. Farm Nutrients has set a range to be within 10 tons of requested tonnage. If we go over this the customer will be contacted for approval of overage.
- 3) Farm Nutrients will establish a hauling and spreader path. As your fields become ready please contact the scalehouse with field information. As the path is established, if you have not contacted Farm Nutrients, we will contact you to verify field position.
